

January 16, 2025

Preferred Name: Daphne Hagiwara Mo  
Legal Name: Daphne Hagiwara Mo  
Date of Birth: 6/7/2013

Student: Daphne Mo

To whom it may concern:

Daphne is currently under the care of providers in the Cancer and Blood Disorders Center at Seattle Children's Hospital. She was recently diagnosed with osteosarcoma, a rare pediatric cancer, and is awaiting the start of therapy. Our planned treatment regimen for this type of cancer is intense and will include chemotherapy and surgery. We anticipate treatment will take about 8 months, if all goes well.

Daphne will require frequent clinic appointments and hospitalizations during treatment. Anticipated side effects from her chemotherapy regimen include nausea, fatigue, and immunosuppression. Treatment will be physically and emotionally demanding and may result in certain challenges for her. It will undoubtedly impact her ability to participate in her academic responsibilities to her typical degree. In addition, Daphne will be severely immunocompromised during the remainder of this school year, so in-person learning will not be appropriate during this period.

Daphne and her parents take her education very seriously and would prefer to suspend her education during her cancer treatment, a decision that our team supports. They plan to resume school back in the fall after her intensive treatment has completed. In the meantime, if Daphne desires to continue a lighter course load or less-intensive classes remotely, we would enthusiastically support this, or any other activities that can keep her mind active during treatment.

Thank you for your attention to this matter, and for your commitment to fostering an inclusive and supportive educational environment for Daphne.

Please feel free to contact us with any questions or concerns.

Sincerely,

Priya Mahajan, MD
